TIME TRIALS IN MINIATURE

To those who are not familiar with the operation or locale of the time trials conducted monthly by the Southern California Timing Association, Inc., the replica of the straight-away course should prove highly educational and entertaining.

With infinite care as to exact reproduction, Bozzy Willis and Otto Crocker have prepared a miniature of the dry lakes locale where the time trials are conducted.

You will observe the cars leave the starting post, run through the traps and return while the miniature drivers receive the official timing on their run and then line up again for another trial.

To the thousands who have never actually seen the time trials, this exhibit will present an animated picturization of this rapidly growing sport.
